MiniOS Alpha — User Manual

1. Introduction

MiniOS Alpha is a command-line operating system simulator developed using Python. It allows users to explore basic operating system functions through text commands.

2. System Requirements

- Windows operating system
- Python 3
- Visual Studio Code (optional)

3. How to Run the Program

1. Open Visual Studio Code.
2. Open the MiniOS project folder.
3. Open the terminal in VS Code.
4. Type `py main.py`.
5. Press Enter to start MiniOS.

4. Login Information

Administrator Account:

- Username: admin
- Password: admin123

Student Account:

- Username: student
- Password: student123

5. Available Commands

- `help` — Displays available commands.
- `clear` — Clears the terminal screen.
- `date` — Displays the current date.

- `time` — Displays the current time.
- `whoami` — Displays the current username.
- `systeminfo` — Displays simulated system information.
- `dir` — Lists files and folders.
- `mkdir` — Creates a folder.
- `create` — Creates a file.
- `read` — Reads a file.
- `write` — Writes or updates file contents.
- `delete` — Deletes a file.
- `process` — Displays running processes.
- `run` — Starts a simulated process.
- `kill` — Terminates a simulated process.
- `memory` — Displays memory information.
- `allocate` — Allocates simulated memory.
- `free` — Releases allocated memory.
- `exit` — Exits MiniOS.

6. Error Handling

Users should enter valid commands and provide the required information. Type `help` to view available commands.

7. Limitations

MiniOS Alpha is an educational simulator, not a real operating system. File, process, and memory operations are simulated. Some functions may vary depending on the implemented code.

8. Conclusion

MiniOS Alpha demonstrates basic operating system concepts through a command-line interface, including login, file management, process management, and memory management.

9. Developer Information

Project Name: MiniOS Alpha
Programming Language: Python
Project Type: Command-Line Operating System Simulator
Developers: Write your group members' names here.
